Campbell Hausfeld Launches New 19.2-Volt REvolution Drill Driver *Backed by customer-friendly warranty, provides more power for the price*

Campbell Hausfeld's REvolution product line has added a new 19.2-volt drill driver that provides 50 percent more torque than comparable models and a 3-year limited warranty—all at an unmatched customer value.

"We're excited to bring such a competitive drill driver to the market," said Amy Blase, Product Manager for Campbell Hausfeld. "Our new 19.2-volt provides optimum power while remaining a good value for the typical do-it-yourselfer."

The new 19.2-volt drill driver delivers 260 maximum in./lbs. of torque, operates at 0-350 and 0-1100 rpms and is powered by a rechargeable NiCD battery. Its two-speed gear box enables maximum control for high and low speed drilling. Other features include:

- Electronic dashboard that incorporates a magnetic tray to secure fasteners, a barrel level for horizontal drilling accuracy, two-speed switch and battery charge indicator light
- Target levels for vertical drilling accuracy
- Keyless chuck for fast bit changes
- Two-finger ergonomic triggers and soft-grip handles to minimize fatigue and maximize comfort

The 19.2-volt drill driver is packaged in a carrying case with a 13-piece accessory kit, extra battery pack, one hour battery charger and AC adapter.

The 19.2-volt drill driver operates on the same battery platform as other 19.2-volt Campbell Hausfeld products, including a work light, circular saw, reciprocating saw and new jig saw.

Suggested retail price for the new 19.2-volt drill driver is \$49.

Founded in 1836 and based in Harrison, Ohio, the Campbell Hausfeld Air Products Division is a leading manufacturer and marketer of pneumatic and power tools, air compressors, inflation and tire safety products.
