

## **New 3-in-1 Woodworking Kit Combines Most Popular Woodworking Tools for Easy Project Completion**

Campbell Hausfeld is providing a one-stop woodworking solution for sanding, routing and cutting applications by introducing the new 3-in-1 Woodworking Kit at the 2001 National Hardware Show and Building Products Exposition, August 12-14.

"We are simplifying woodworking projects by providing customers with a versatile rotary tool that easily converts to a router, cutter or sander when paired with one of the three attachments," said Jeff McGrady, Campbell Hausfeld Marketing Manager for Tools and Accessories.

Housed in a high-impact storage case, the 3-in-1 Woodworking Kit (model PL1574) features a .5 horsepower pneumatic rotary tool that generates 25,000 RPM to operate attachments such as the included router bits, cutting bits and a sanding drum. The Kit comes equipped with router guides for straight cuts and a cutting depth guide for maximum precision, as well as a pair of safety glasses, template guides, a ¼" industrial NPT(M) plug, a ¼" collet and a variety of wrenches.

The 3-in-1 Woodworking Kit will sell for a suggested retail price of \$89 and will be available nationwide at home centers and farm supply stores. Customers can obtain purchasing information by calling 1-866-CHPOWER (1-866-247-6937) or by visiting [www.chpower.com](http://www.chpower.com).
