

Campbell Hausfeld Enhances Welder Usability, Performance With New Stick Welder

Campbell Hausfeld has completely redesigned the traditional welder by developing a first-of-its-kind 230V single-phase stick welder (WS2800) that features new storage, portability and performance options.

"We have taken an old stand-by and put a new spin on it to enhance our users experience when tackling welding projects," said Jim Nutter, Product Manager for Welders at Campbell Hausfeld. "We listened to users about what features they would like to have in a welder and designed the product to meet those desired benefits."

The key benefits of the WS2800 include:

- **User-Friendly Design:**

The WS2800 eliminates clutter by providing built-in storage for stick electrodes, cords, accessories and helmet. The unit also features quick-connect dinse plugs on the electrical leads that enable the cords to be easily removed and stored.

- **Increased maneuverability:**

The unit is mounted on an integrated cart that combines wheels and casters. The welder also can be positioned vertically or horizontally depending on the users need.

- **More Precise Output:**

The WS2800's infinite output adjustment feature allows users to dial-in the exact amperage output required (up to 225 amp AC maximum output) based on the material they are welding. Most 230-volt welders available on the market require users to choose between predetermined incremental outputs, which sacrifice welding precision.

- **Added Safety:**

The WS2800 provides dual protection by combining an integrated circuit breaker to protect against short circuiting and a thermal cut-off switch to eliminate overheating.

The WS2800 comes with a starter pack of stick electrodes, chipping hammer/brush and a face shield. Backed by Campbell Hausfeld's Built to Last five-year warranty, the WS2800 is available at select retailers and by calling 1-888-CHPOWER (1-888-247-6937). Suggested retail price is \$199-\$219.

Founded in 1836 and headquartered in Harrison, Ohio, Campbell Hausfeld is a leading manufacturer and marketer of air compressors, air tools and accessories, paint sprayers, welders and pressure washers.
