

Maxus™ by Campbell Hausfeld Launches Nine Options for Portable Power

Maxus™ by Campbell Hausfeld has launched nine heavy-duty portable compressors for contractors and serious do-it-yourselfers, including a twin stack with the highest horsepower and air delivery available and one of the most robust wheelbarrow units on the market.

"Our goal is to be the preferred source for air power on the job site," said Brad Miller, Product Manager for Campbell Hausfeld Air Compressors. "We have specifically designed our compressors with premium features so our customers can rely on safe and easy operation today and into the future."

Maxus compressors are built for optimum performance and longevity. Many models feature rugged cast-iron pumps, which are more than 35 percent quieter and 60 degrees cooler than aluminum pumps with cast-iron sleeves. Several Maxus compressors feature low amperage draw motors to accommodate varying electrical conditions on the job site and reduce the risk of tripped circuit breakers.

Heading up the Maxus compressor line, the EX8003 is a 5.5 HP, 8-gallon wheelbarrow unit powered by the contractor-preferred Honda GX series engine for reliable performance. Its durable cast-iron twin-cylinder, oil-lubricated pump delivers 10.3 SCFM at 90 PSI. The protected control panel embedded in the base plate includes two oversized gauges, two universal couplers and a heavy-duty regulator for convenient operation. The unit also features a large, robust pneumatic wheel for easy portability and a stronger axle mounting system that reduces the chance of axle damage. Suggested retail is \$799.

Another highlight to the Maxus line, the EX8000 is a 3.25 peak HP, 4-gallon twinstack that delivers 6.2 SCFM at 90 PSI, the highest HP and air delivery twinstack in the marketplace. The superior airflow allows it to run multiple framing or roofing guns at the same time. The EX8000 features an easy-to-read control panel with two universal couplers, an Emerson motor and a low-maintenance oilless pump. Suggested retail is \$299.

In addition to the EX8000 and the EX8003, the new Maxus portable compressor line includes:

- **EX8009 5.5 HP, 20-Gallon Air Compressor:**

Rugged cast-iron twin-cylinder, oil-lubricated pump features a reliable Honda GX series gas engine. Can operate two framing nailers at the same time. Suggested retail price is \$799.99.

- **EX8300 5 Peak HP, 20-Gallon Cast-Iron Air Compressor:**

High-performance motor operates on 120/240-volt current. Features a solid cast-iron twin-cylinder, oil-lubricated pump. Delivers 5.8 SCFM at 90 PSI. Suggested retail price is \$359.99.

- **EX210189AV 2 Peak HP, 4-Gallon Air Compressor with 2" Brad Nailer Kit:**

This lightweight compressor kit is ideally suited for fastening applications. High-impact shroud protects components from damage while simplifying operation. The included nailer kit includes a 2" brad nailer with nails, high-impact carry case, nailer oil, industrial plug, universal coupler, Allen wrenches and 25' air hose. The suggested retail for the kit is \$219.99. The compressor is available without the kit (EX2101) and delivers 2.6 SCFM at 90 PSI. Suggested retail price is \$169.99.

- **EX8001 2.5 Peak HP, Oilless Twinstack Air Compressor:**

Features four-gallon twinstack tank and slower speed pump (1,725 RPM) for long life and quiet operation. Lower amp draw is beneficial for the varying electrical conditions around the job site to reduce the chance of tripped circuit breakers. Delivers 4.3 SCFM at 90 PSI. Suggested retail price is \$269.99.

- **EX8002 2.5 Peak HP, 4-Gallon Pancake Air Compressor:**

Low-profile pancake tank with spacious footprint reduces the chance of tipping. Features an oil-free compressor pump that requires little maintenance. Delivers 4.3 SCFM at 90 PSI. Suggested retail price is \$249.99.

- **EX8005 2.5 Peak HP, 4-Gallon Air Compressor:**

Features a low-profile twinstack tank and oil-lubricated pump, control panel with easy-to-read gauges and 2 "universal" couplers.
