

New Inflator Keeps Travel From Going Flat

Campbell Hausfeld, a leading manufacturer of air compressors, pneumatic tools and tire repair and safety equipment, provides road(side) warriors with a fresh new inflator with built-in flashlight making tire pressure adjustments convenient at any time of day.

"The RP3100 breaks out of the traditional black-box housing for inflators," explained Tim Davis, Senior Product Manager for Campbell Hausfeld Tools & Accessories. "We are trying to reach an active-lifestyle consumer by combining a sporty design with easy-to-use controls that improve safety."

In addition to the flashlight, the bright blue RP3100 features an auto shut-off gauge that allows the user to set the desired air pressure. The inflator will automatically shut-off when the pre-set pressure is achieved to ensure proper inflation for every use, reducing the danger related to over- and under-inflated tires.

The inflator plugs into any automobile cigarette lighter or 12-volt power outlet and has a long 11' cord for easy access in and around an automobile. Three inflation accessories make applications such as inflation of sports balls quick and easy.

The RP3100 has a suggested retail price of \$19.96 and is available at Wal-Mart locations nationwide. Customers can obtain product information by calling 1-888-CHPOWER (1-888-247-6937) or by visiting www.chpower.com.

Founded in 1836 and headquartered in Harrison, Ohio, Campbell Hausfeld is a leading manufacturer and marketer of air compressors, air tools and accessories, paint sprayers, welders and pressure washers.
