

Campbell Hausfeld's New Arc Welder Features Advanced Arc Technology™

Campbell Hausfeld has launched a new arc welder that brings a new fresh look and advanced engineering to its welding program.

The WS0970 incorporates a sloped front panel that allows easy interaction with all controls as well as the company's new Advanced Arc Technology™ that combines a highly efficient main transformer with a secondary, independent transformer that powers the drive deck to deliver a smooth, stable arc and consistent wire feed for the perfect weld bead.

The WS0970 delivers 70 amp AC output to weld from 18-gauge to 1/8" steel. It operates on standard 115V power. Backed by a five-year limited warranty, the WS0970 features:

- Two heat settings that are pre-set to match up to 1/16" or 5/64" electrodes.
- Thermal overload protection with automatic shut off.
- Ingenious on-board storage for the cables, face shield and chipping hammer/brush.

The WS0970 is available at Wal-Mart locations nationwide as well as retailers such as Home Depot Supply, ACE, Blains, Sutherlands and Marvins. It also is sold at Tractor Supply Company under the Farmhand brand and Canadian Tire Corporation under the Mastercraft brand.

Founded in 1836 and headquartered in Harrison, Ohio, Campbell Hausfeld is a leading manufacturer and marketer of air compressors, air tools and accessories, paint sprayers, welders and pressure washers. Customers can obtain purchasing information by calling 1-888-CHPOWER (1-888-247-6937) or by visiting www.chpower.com.
