

## **New WF2050 Flux Core Welder Features New Design, Engineering**

Campbell Hausfeld has launched a new 115V Flux core, wire-feed welder with improved design and engineering, the WF2050. The WF2050 delivers 70 amp DC output to weld 18-gauge to 3/16" steel and has a 20 percent duty cycle.

The WF2050 incorporates Campbell Hausfeld's new Advanced Arc Technology™, which combines a highly efficient main transformer with a secondary, independent transformer that powers the drive deck to deliver a smooth, stable arc and consistent wire feed for the perfect weld bead.

In addition to Advanced Arc Technology™, the unit includes features such as:

- A professional Trigger-Activated Torch for precise weld placement.
- A dual heat setting to easily adjust output for projects with different metal thicknesses.
- Thermal overload protection with automatic shut off.

The WF2050 is packaged with a welding shield, hammer/brush, starter spool of Flux core wire and quick start guide. The drive roll accepts .030" and .035" wire in 4" or 8" spools.

The WF2050 is backed by a 5-year warranty and is available at Wal-Mart locations nationwide as well as retailers such as Home Depot Supply, ACE, Blains, Sutherlands and Marvins. It also is sold at Tractor Supply Company under the Farmhand brand and Canadian Tire Corporation under the Mastercraft brand. Suggested retail price is \$199.

Founded in 1836 and headquartered in Harrison, Ohio, Campbell Hausfeld is a leading manufacturer and marketer of air compressors, air tools and accessories, paint sprayers, welders and pressure washers.
