

Campbell Hausfeld Pressure Washers Introduce Cleaning Power at Your Fingertips

Line of electric pressure washers with adjustable pressure nozzles improve cleaning efficiency

Campbell Hausfeld provides homeowners with more convenience as they begin spring cleaning their property by introducing two new pressure washers featuring the TurboNozzle, a new accessory that allows users to control water pressure at the lance rather than at the pressure washer unit.

"When cleaning surfaces located 25 feet away from the actual unit, walking back and forth to adjust the dial becomes some serious exercise," said Jim Maffei, pressure washer product manager at Campbell Hausfeld. "We have created the TurboNozzle to allow users to increase their cleaning efficiency."

Featuring 35-foot power cords and using 80 percent less water than a basic garden hose, the TurboNozzle models are ideal for cleaning projects around the home, farm, or small business including equipment, driveways, building exteriors, decks and patios.

The Campbell Hausfeld TurboNozzle models:

- **PW1580:**

Provides 1.7 gallons per minute (GPM) at 1,500 pounds per square inch (PSI). Designed for all basic home projects, this 3.5 peak horsepower (HP) model features an instant start/stop motor to extend the pump and motor life, dual detergent tanks and a 25-foot pressure hose. Available at Wal-Mart.

- **PW1686:**

Delivers 1.6 GPM at 1,650 PSI. Powered by a heavy-duty induction motor, this model is ideal for tough outdoor projects. It features a cast aluminum pump for extended durability, a 25-foot pressure hose and cart with built-in detergent tank and accessory storage. Available at Tractor Supply Company.
