

Campbell Hausfeld Pumps Up Ease & Safety of Tire Inflation

Campbell Hausfeld, a leading manufacturer of air compressors, pneumatic tools and tire repair and safety equipment, introduces two new inflators with user-friendly designs that make tire pressure adjustments safer and easier than ever.

CC2400 Cordless Inflator/12-Volt Power Supply

The CC2400 is a rechargeable, cordless inflator and 12-volt power source with a bright built-in flashlight that can be easily stored in the car and transported anywhere.

"The CC2400 is the ultimate tool for any auto owner," explained Tim Davis, senior product manager for Campbell Hausfeld Tools & Accessories. "It is invaluable for safety during roadside emergencies and convenient to use at home to check tire pressure, for quick inflation projects and to power and recharge most 12-volt accessories."

The CC2400 features an easy-to-use digital pressure gauge with automatic shut-off that allows the user to set the desired air pressure. The inflator will automatically shut-off when the pre-set pressure is achieved to ensure proper inflation for every use, reducing the danger related to over- and under-inflated tires.

The included 110-volt AC adaptor and 12-volt DC adaptor allow the CC2400 to be recharged at home or in the car. Three inflation accessories make applications such as inflation of sports balls quick and easy. The CC2400 has a suggested retail price of \$39.99 and is available at Wal-Mart stores nationwide.

RP0500 12-Volt Compact Inflator

The RP0500 12-volt compact inflator easily fits into a glove compartment and plugs into any automobile cigarette lighter or 12-volt power outlet. While its small size allows it to be carried and stored virtually anywhere, the RP0500 features a high-pressure pump that provides plenty of power to inflate items such as tires and sporting equipment. The RP0500 includes three inflation accessories. It has a suggested retail price of \$9.99 and is available at Wal-Mart stores nationwide.
